

SureCash V2

Design Pattern and theme

This is SureCash V2 app Dashboard. The new design is clean, simple and straight forward and also align with brand identity. We have renovated the navigation system, icons style, service layout, and Information Architecture.

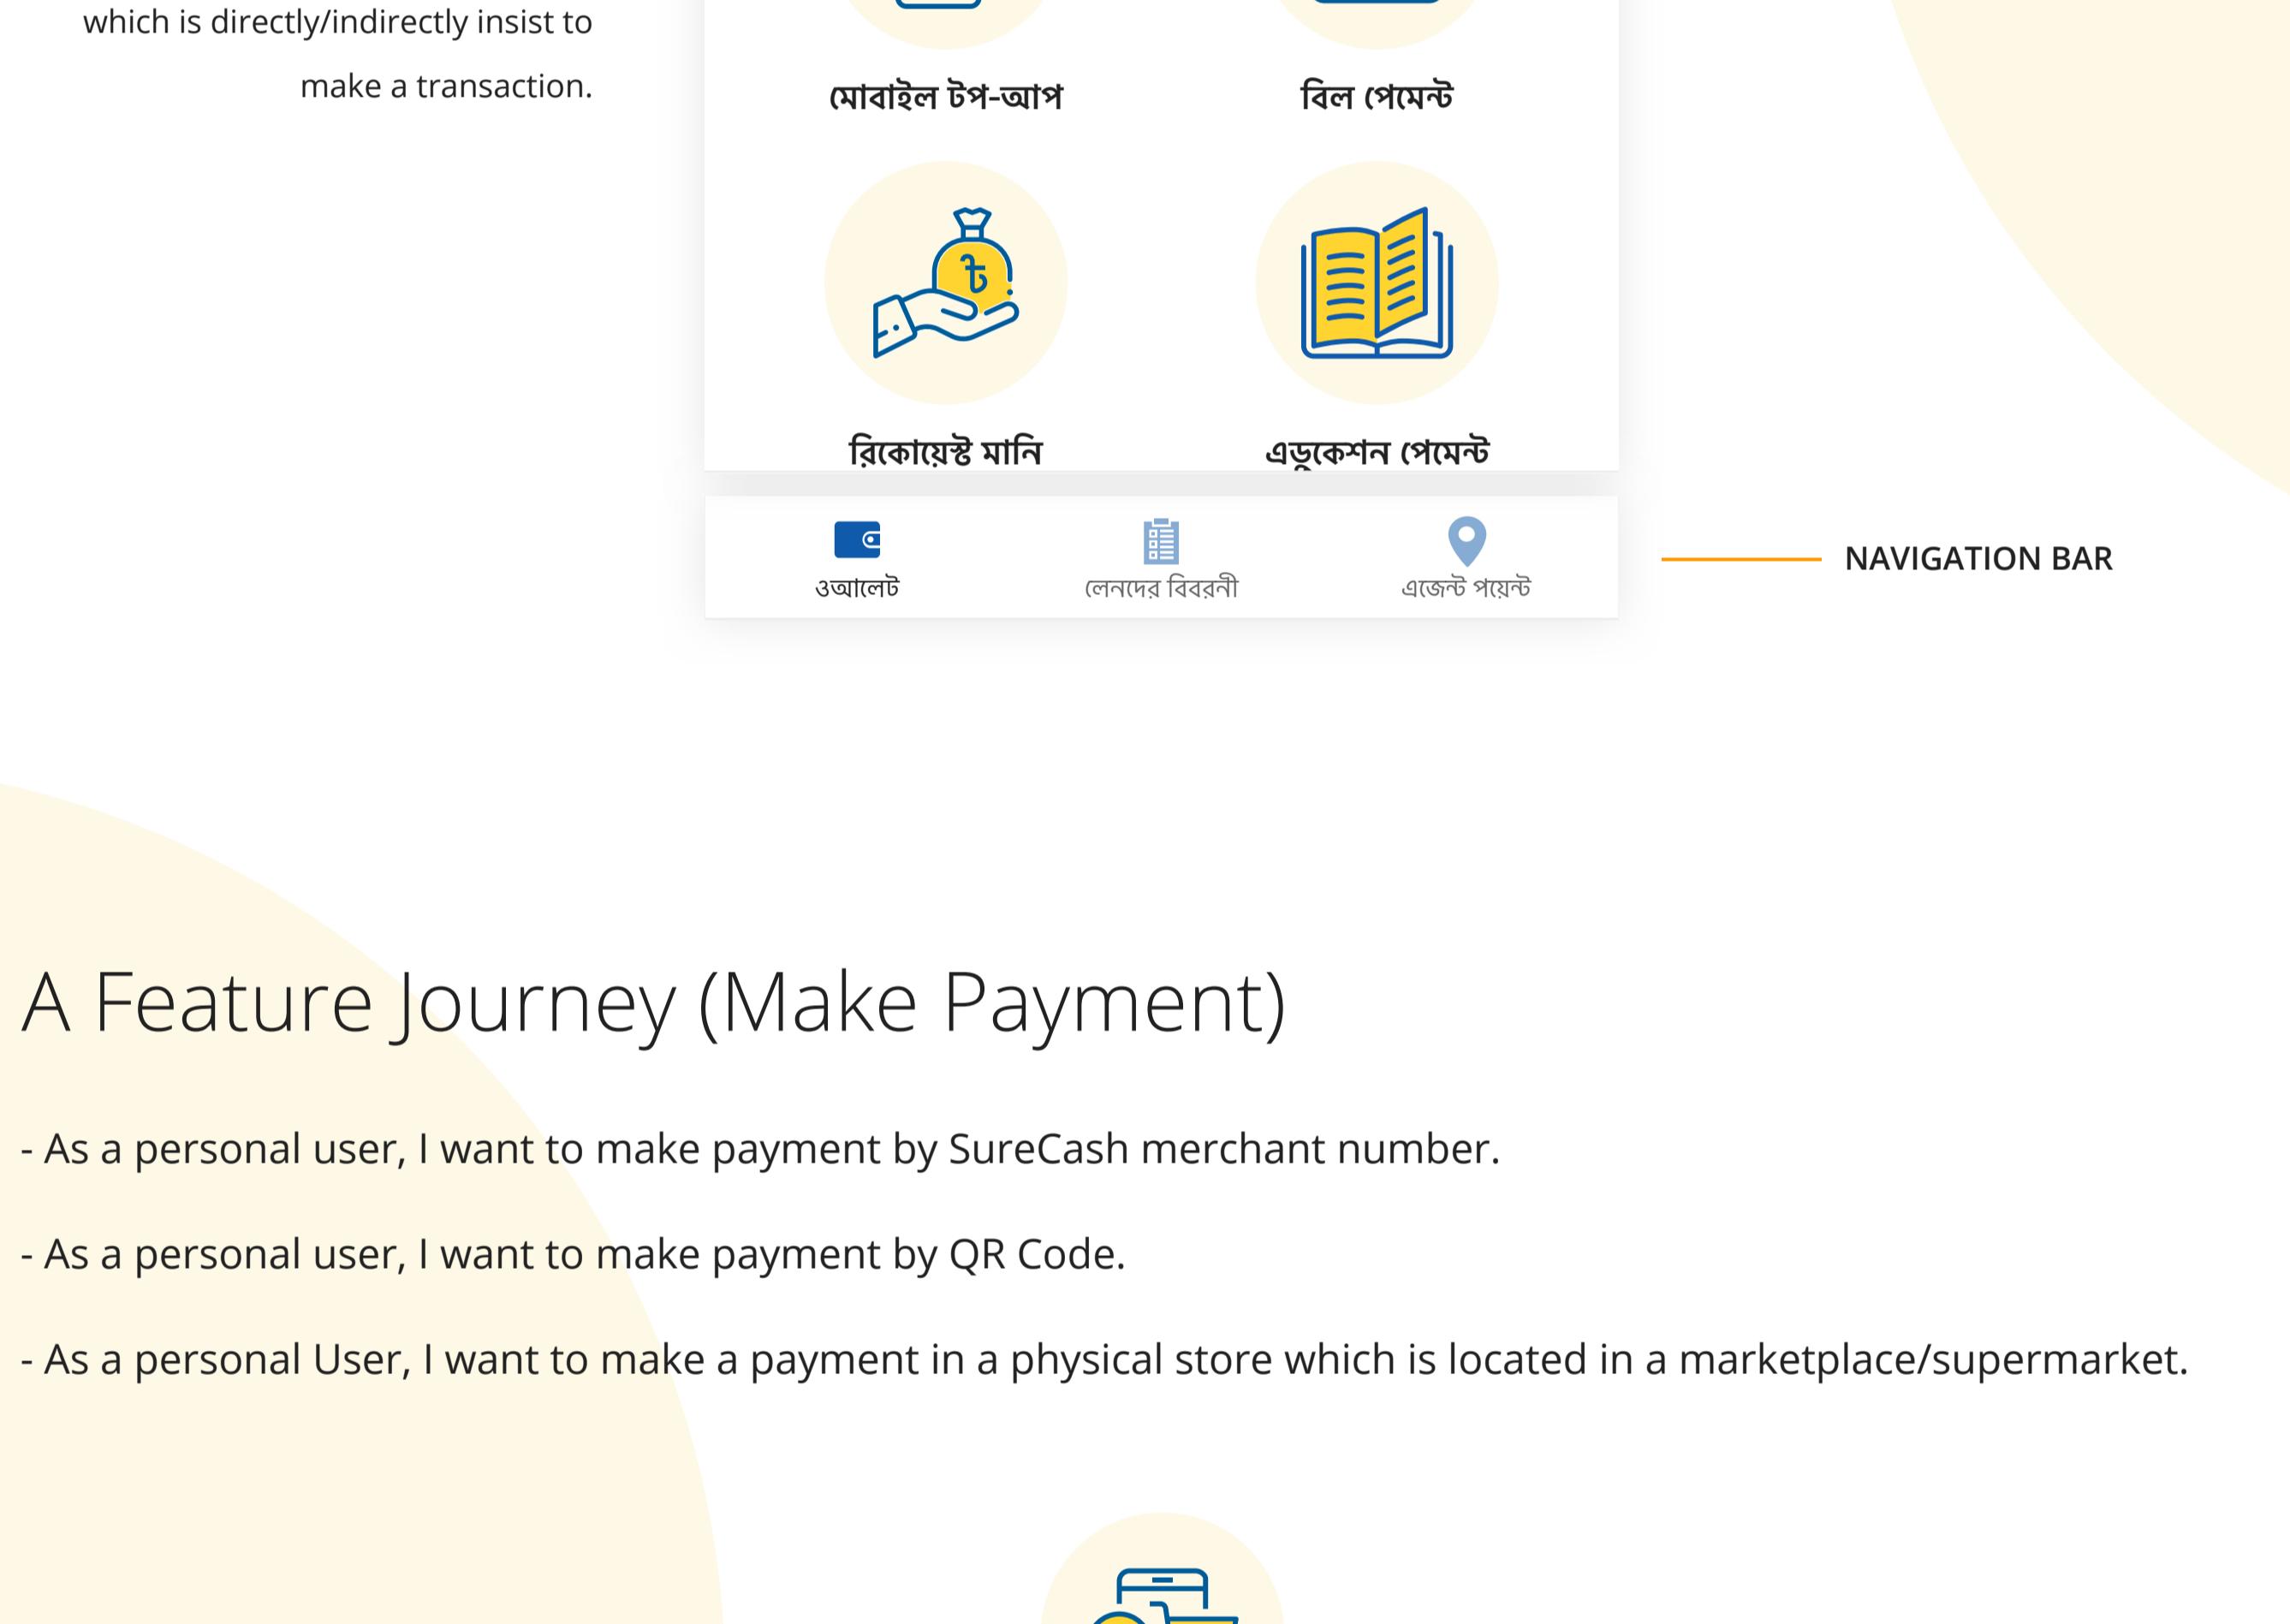

The navigation and app layout structured on **Strict Hierarchy Model**.

It gives users only one way to access the subpages: from the main page. This structure is a good choice for digital products that have a specific purpose.

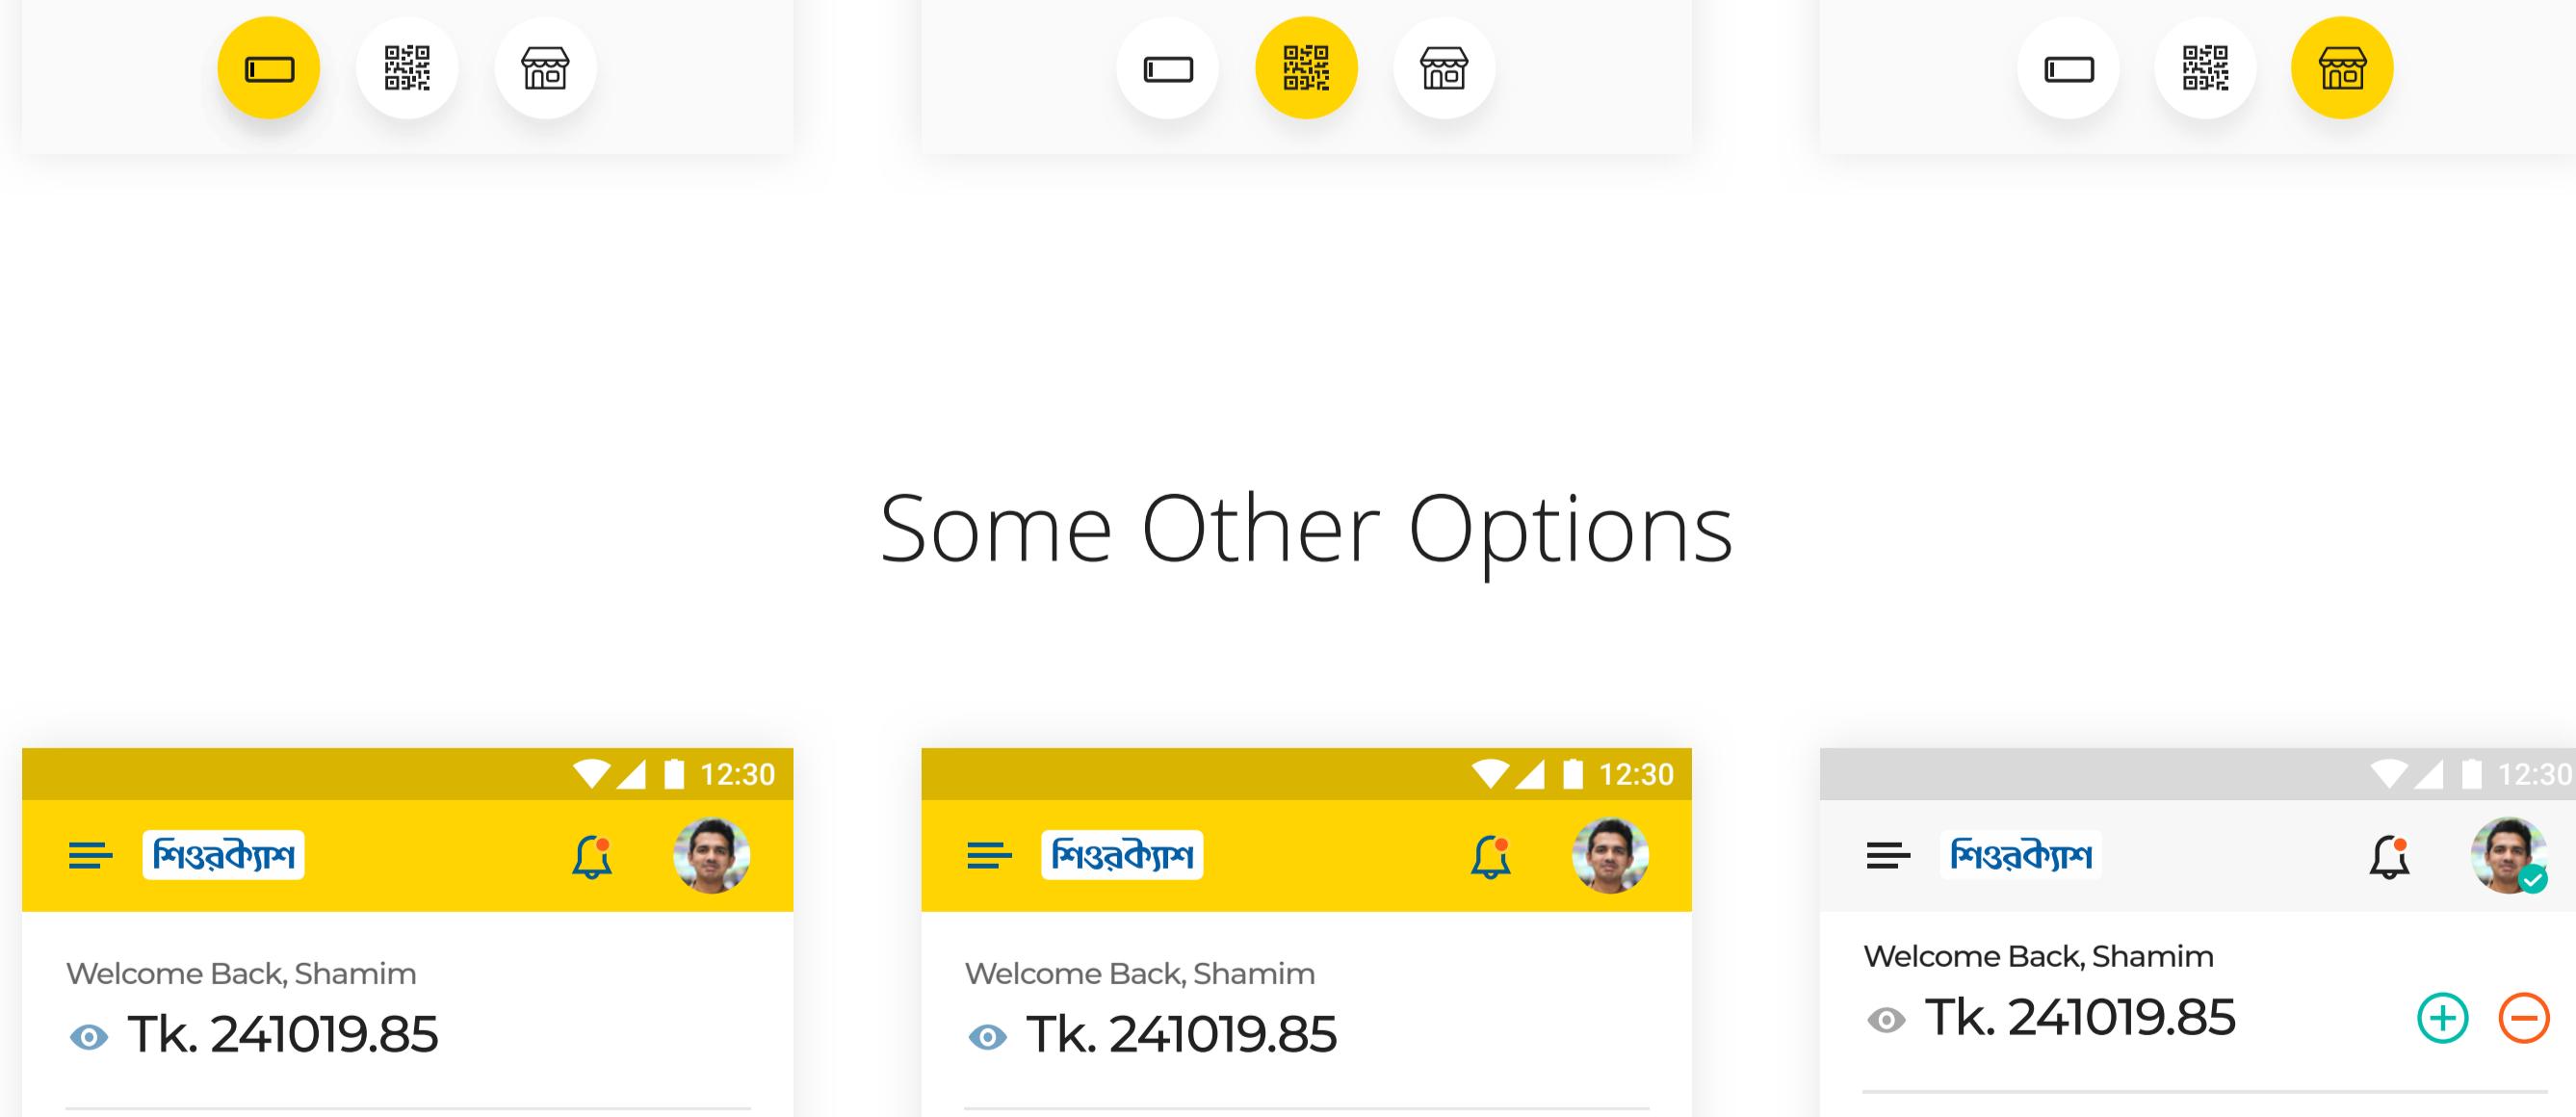

Anatomy of Dashboard

Dashboard architecture is based on less is more. We are showing only those information which really matters to user needs and business goal.

A Feature Journey (Make Payment)

- As a personal user, I want to make payment by SureCash merchant number.
- As a personal user, I want to make payment by QR Code.
- As a personal User, I want to make a payment in a physical store which is located in a marketplace/supermarket.

Some Other Options
